## INFORMATION

### Water Regulations:

Electrolux washers are WRAS approved and meet and exceed UK water regulations even at highest risk category 5 for healthcare, pharmaceutical and food hygiene applications.

### Healthcare Regulations:

Compass Control future proofs against any changes to NHS guideline **HSG (95) 18** (Hospital laundry arrangements for used and infected linen) **BS EN 14065** (Laundry processed textiles bio contamination control system).

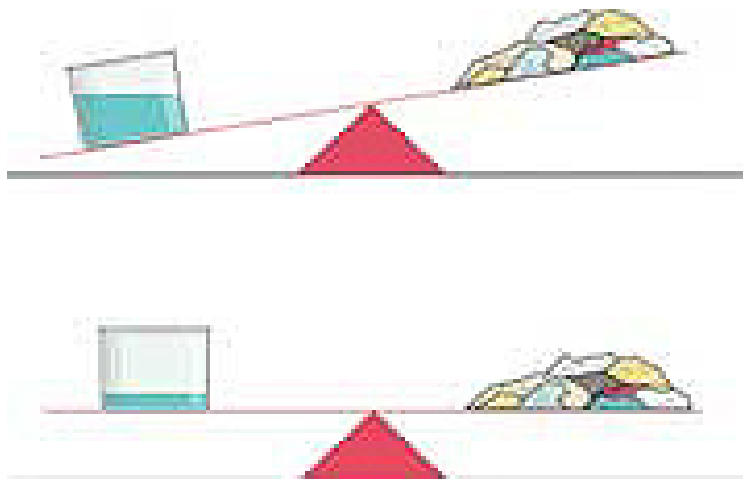

The Electrolux range of Mop Washer extractors is also fully compliant to **The Health Act 2006** (Code of Practice for Prevention & Control of Health Care Associated Infections).

### Economy:

Electrolux Washers provide complete peace of mind that **Government & NHS guidelines for best value procurement & energy & environmental policies** have been met.

### Environment:

Our specially developed automatic weighing system **AWS** gauges each load & adapts the amount of water used so that not one drop of water is wasted unnecessarily. Less water to be heated means a reduction in electricity consumption and therefore also reducing cycle times when the machine isn't full. A life cycle (water) analysis can demonstrate **savings of more than £20,000** in water on a small 7.5kg mop washer extractor.

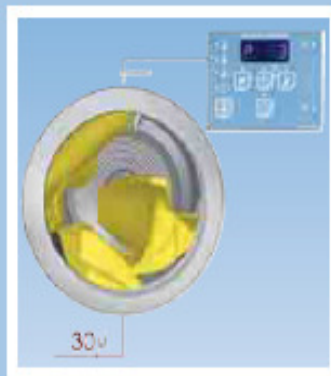

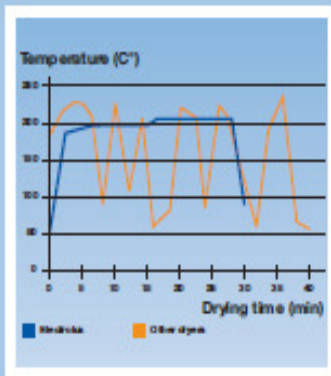

The Name For "On Premises" Laundries

## Electrolux Dryers for Optimum Performance:

Electrolux's dryers are available with our Auto Stop feature which is unique to Electrolux and ensures maximum efficiency within your laundry. Please see below for further information regarding our tumbler dryers. **Residual Moisture Control** is an extremely eco friendly feature allowing drying to a pre determined moisture content. This can be set to 100% dry / for ironing purposes 85% dry and stop etc. This ensures no energy is wasted, items are protected from over drying and fire risks are mitigated.

# Exceptionally high performance combined with cost efficiency

Obtain great results and improve your laundry's efficiency by minimizing running costs with Electrolux tumble dryers.

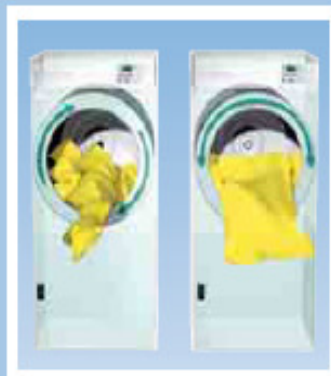

### Accurate temperature control

Extensive laboratory tests show that Electrolux tumble dryers provide shorter and more efficient drying cycles thanks to their accurate temperature control.

### Residual Moisture Control

RMC measures the exact moisture content in the linen and automatically helps you to save time, energy and money. It is a must for delicate fabrics like wool and silk.

### Advanced blower wheel

With our new generation blower wheels it is possible to optimize airflow and minimize maintenance costs.

### Reverse drum action

The counter-clockwise drum rotation prevents linen from tangling and wrinkling, thus improving drying efficiency and making finishing easier.

## Clarus control system:

Clarus controls are fully programmable and enables up to 192 customised programmes to be created & labelled for personalised laundry needs. With Clarus controls Wash Programme Manager can be added enabling full auditing and recording of all processes.

### Clarus Control®

Our Clarus Control® microprocessor perfectly combines timing, optimal water levels and temperature to ensure superior performance with minimum consumption.

Clarus Control® monitors all machine functions: 9 standard and 192 customisable programs.

You can use the memory card to download new programs which have been created on your PC or transfer programs quickly and easily from one machine to another. With our "Wash Program Manager" software package you can easily generate wash programs for Clarus and Compass controls on your PC.

### **Ironer IC44821 - Dubixium Cylinder:**

This option is unique to Electrolux. We have designed a cylinder with twin walls and 50% in-filled with thermal oil. As the roller rotates, the hot thermal oil is moved around the cylinder and so reduces hot spots & improves production and quality of work.

**Dubixium™**  
With the unique "Dubixium™" cylinder, you will never again experience loss of production due to the sides of your ironer overheating. By means of a patented thermal oil flow inside the cylinder, heat is always evenly distributed through the length of your ironer. With the Electrolux "Dubixium™", you will experience the comfort of steam, without steam guaranteeing your business maximum profitability.

### **Environmental:**

Electrolux is the leading manufacturer of environmental friendly and efficient range of laundry equipment. All product development must have this important element designed in from concept and carried all the way through design, manufacture, operation and disposal after the working life is over. Electrolux is the only company in its field to be quoted on the Dow Jones 100 list for Sustainability.

Continuation Page

Electrolux factory tests concluded that Electrolux machines use less litres of water per kg of work washed and less kWh per litre of water evaporated in the tumbler dryers than other manufacturers. A Danish independent research institute has also bench marked some European laundry equipment and has confirmed these findings. This all helps, alongside product reliability, to ensure the lowest running costs to provide the minimum whole life time costs. Please see Electrolux web site for further details or hard copy is available upon request.

**Finance:**

OPL Limited offer a very popular rental scheme whereby the monthly premium is fixed and inclusive of all breakdowns throughout and also flexible leasing options upon request.

**Drawing:**

Subject to a laundry site visit, we will be able to take measurements and submit a laundry layout to show the proposed machines positioning and services required if requested.

**Warranty:**

Electrolux supplied with 12 months parts & labour warranty. Up to four years additional maintenance at time of purchase available. Other brands TBA.

**Delivery:**

Delivery is to nearest point of access unless otherwise arranged.

**Installation:**

If OPL Limited are carrying out installation without a site survey, this is based on all supplies being correct and within one metre and no access restrictions / stairs. If supplies are to be run / altered or access restrictions / stairs this is subject to quotation.

**Delivery Time:**

TBA at time of ordering as stock positions can vary.

**Terms & Conditions:**

All transactions governed by OPL Limited terms & conditions: [www.opl-ltd.co.uk/terms](http://www.opl-ltd.co.uk/terms)
